

## SuperaC Slimline Toolholder : HSK - A + C DIN 69893

**Please Note:** Other HSK sizes and gauge lengths available on request.

HSK 'E' for high speed applications also available.

Please phone for details.

Dynamically balanced to G2.5 at 20,000 rpm  
Order example  
HSK50A – SHYD06-080G2.5

For Coolant Tube and Wrench see page 134

## SuperaC: Special Hydraulic Rotating Toolholder Applications

### ■ Extended Gauge Lengths

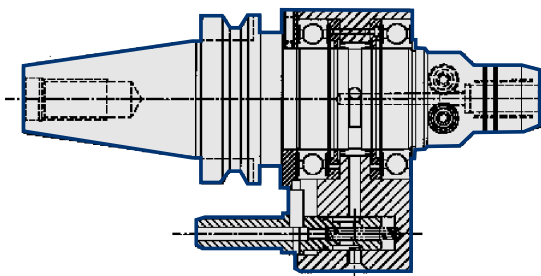

- Full range of extended hydraulics on all Tapers
- Extensions up to 300mm possible.
- TIR 3 microns at nose.

### ■ HSK - High Speed Applications Up To 40,000 rpm

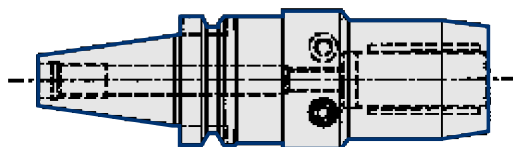

- Hydraulic front ends available on all high speed HSK Tapers A,E,F.
- Drawing depicts HSK 32E to HYD 12.

### ■ Rotary Coolant

- Special applications for minimised run out and through coolant.
- Drawing depicts BT50-R-HYD20.

### ■ All Taper Types

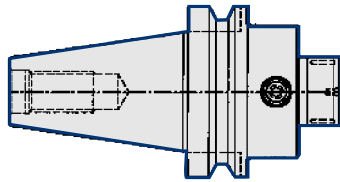

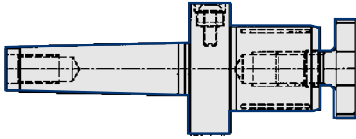

- Other Tapers to order including:
- Modular systems
- Straight Shank
- Morse Tapers
- Drawing depicts BT30 to 20mm Bore

## SuperaC: Special Hydraulic

### Workholding Applications

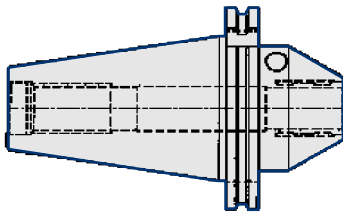

#### ■ Expanders For Workholding Applications

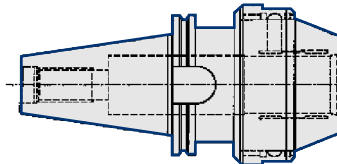

- For gripping on internal diameters
- Can be used as inspection fixture
- Accurate location - within 3 microns
- Taper/flange mounted
- Gripping diameter up to 60mm
- 3 micron run out

#### ■ Hydraulic Gripping For Workholding Applications

Manual version

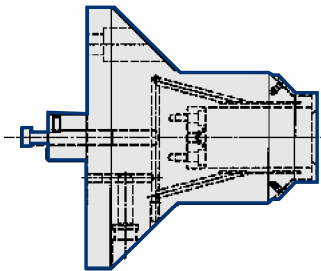

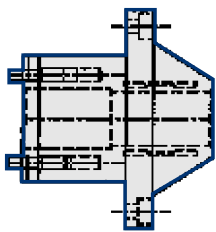

Automated version

- Taper/flange mounted
- Manual screw generation
- Unique design, enables clamp/unclamp by robot in fully automated machining cycles
- Bore sizes up to 120mm

#### ■ Automated For Workholding Applications

- Automatic clamping within machine cycle
- Used extensively on tool & cutter grinding machines as OEM fixture or retrofit
- High accuracy - 3 microns max run out
- Good access for grinding wheels/cutters
