

SPECIAL HEAT SHRINK TOOLHOLDERS

For some applications a special heat shrink toolholder can be the optimum way to resolve your machining problems.

Coventry Toolholders offer a complete Heat Shrink design and manufacturing service.

We can match most taper types, HSK, BT MAS403, DIN69871, CAT ANSI, ISO/DIN 2080, to a standard or special Heat Shrink front end.

Features

- Extended gauge lengths are a speciality.
- Metric or Imperial bore sizes.
- Extended bore depths to accommodate long shank carbide tools.
- Long series extensions.
- Difficult access situations.
